|--|--------------------|-----------------|
| Wheat flour, white, all-purpose, enriched, bleached | 14 oz. | |
| Wheat flour, whole-grain, soft wheat | 1 lbs. | |
| Leavening agents, baking powder, low-sodium | 1 1/8 oz. | |
| Sugars, granulated | 1 1/8 oz. | |
| Salt, table | 5/8 oz. | |
| Butter, without salt | 10 1/2 oz. | |
| Milk, fluid, nonfat, calcium fortified (fat free or skim) | 20 fl oz | |
| Chicken Nuggets, Breaded, Uncooked, 2M, 28/5.68oz, 10#, Tyson, 10383860928 | 75 | |
| Honey | nugget 1 1/2 c. | |

Preparation Instructions

HACCP Process: #3 - Complex Food Preparation

1. Preheat oven to 425 degree F. Combine flours, baking powder, sugar, and salt in mixer with paddle attachment.
2. Grate butter on a grater, medium size. Use gloves so butter doesn't get too warm. As dry ingredients are mixing, add cold butter on low speed until mixture looks coarse and crumbly. Do not over mix.
3. With mixer running, slowly add buttermilk until mixture comes together. You may need to add a little extra buttermilk or not add all of it, it depends on the dough. Only add enough for it to come together. Once again, do not over mix. Turn dough out on a lightly floured work surface. Knead dough gently a few times.
4. Scrape surface and flour surface again. Roll dough 3/4 inch thickness and cut biscuits into 2 1/2 inch rounds. Place biscuits on a parchment lined sheet pan. Bake at 425 degrees F for 10-15 minutes until biscuits are golden brown and done in the center. Reduce oven to 350 degree F.
5. Place chicken nuggets on a half sheet tray and bake at 350 degree F oven for 10 minutes or until the internal temperature reaches 165 degree F.
6. Remove chicken from oven and drizzle with honey.
7. To serve, slice the biscuit in half. Place 3 nuggets on each biscuit. Top with the biscuit half and serve.

Separate raw animal foods, such as eggs, fish, meat, and poultry, from ready-to-eat foods, such as lettuce, cut melons, and lunch meats during receiving, storage, and preparation.

Food prep areas, equipment, and utensils, to be used in recipe will be washed and sanitized prior to beginning the preparation and cooking.

Assemble all ingredients, utensils, etc. to be used in recipe within easy reach of prep area so that food safety can be managed more effectively as well as better control of contamination and cross

Remove products from storage using oldest pack date first. If frozen, keep product in original packaging and place in a pan(s). Place in cooler following proper HACCP storage guidelines to prevent cross-contamination.

CCP: Take and record on a temperature log all beginning temperatures of refrigerated foods before beginning the recipe.

Wash hands thoroughly before handling food, after handling contaminated food or objects, and before switching to another step where there is an opportunity for contamination. This applies as well to before and after glove use. Use clean pair of gloves when handling raw product. Replace gloves after handling any other object.

If a recipe contains a combination of meat products, cook the product to the highest required temperature.

CCP: Heat to 165° F or higher for at least 15 seconds.

Remove product from oven. Caution! Finished product is hot. Use oven mitts when handling product to avoid injury.

CCP: Place product in warming cabinet until served. Ensure that hot food is held at a temperature above 140° F.

CORRECTIVE ACTION HOT FOOD: All cooked food items being held for service that drop below 140 degrees must be removed from service until such time as they are reheated to 165 degrees. Any food not eaten after reheating must be discarded.

CCP: Maximum holding time is two (2) hours. Discard product after maximum holding time is reached. Do not reheat product.

CCP: Cool to 70 °F within 2 hours and to 40 °F or lower within an additional 4 hours.

CCP: Record time and internal temperature of completed recipe on daily log.
